

<u>Issue #</u>	<u>Summary</u>
K3D-2342	Sketch function displays inferences to which it does not snap (case 2)
K3D-2345	Sketch function shows preview line at incorrect length
K3D-2356	Sketch function curve preview is not updated when a value is input
K3D-2357	DynaHandle tooltip missing in Sketch function
K3D-4256	Model mode detail entities not shown in layout when part of a composite
K3D-5795	Dimensions become unassociated from Detail Callouts on a Section View if Section View is moved
K3D-5852	Hole Table hole labels are misplaced when using Part Refs in layout
K3D-7391	Space key cycling to next entity is not always working
K3D-7561	Feature selection does not work on faces in part references
K3D-7636	STEP file created in KC2021 SP0 will not open in NX
K3D-7678	This SolidEdge DFT file imports with 0 entities but opens with entities.
K3D-7694	Feature hole 2D reps can't be drawn with Line Style = hidden
K3D-7703	File Open of Solid Edge PAR file scales geometry incorrectly
K3D-7706	Dynahandle direction not working correctly when editing part references in context
K3D-7725	Selecting entities to Print gives bad result
K3D-7748	If a part reference was saved in layout mode, editing in context will add new geometry to layout and not the model
K3D-7753	Pre-selection does not work if the Conversation Bar is undocked.
K3D-7756	CATDrawings and ProEDrawings can be opened in the KC Pro Premium product level but should not be.
K3D-7806	Auto-migration is not copying custom display settings over to the new installation
K3D-7808	Opening a file with References takes far longer than opening the same file without references.
K3D-7809	It takes too long to open Assembly files that reference CKD's with Layouts (versus the same Assembly with no Layouts)
K3D-7817	The "Associate to Display View" checked ON via HLR Settings is not carried over during layout creation to created instance.
K3D-7830	REGRESSION: No context menu available while placing a new instance
K3D-7838	Repeatable crash in Sketch function
K3D-7839	Function and Accelerator keys are disabled during Sketch function
K3D-7855	SDK function GetEntity erroneously return CKDocChange after part is toggled out of Layout mode
K3D-7864	Cannot turn off modifier when creating radial dimension by two positions
K3D-7882	Reading & Writing Catia files do not work on some machines
K3D-7899	The Help system should change all references of "Accelerator Keys" to "Shortcut Keys"
K3D-7912	Creating detail callout of tagged composite causes composite to shift to the origin
K3D-7919	KeyCreator unable to open attached Parasolid file created by Solidworks 2021
K3D-7938	KeyCreator dropping portions of file name on save as if name contains a period
K3D-7940	Creating Instances throws Unknown Exception errors and sometimes crashes KC.
K3D-7947	Selecting Format in the context menu for a note within a composite incorrectly shows the Format Composite dialog
K3D-7948	KeyCreator crashes without any warning when opening the attached STEP file.
K3D-7986	DynaSketch does not properly handle the Universal Position menu choice
K3D-8022	Tools>Feature>Pocket not obeying set construction plane
K3D-8023	High-lighted part reference overlaps everything
K3D-8039	Most edges in this solid can not be selected (if Foreground Selection is enabled)
K3D-8067	Position Snap ToolTips and markers are missing in Sketch
K3D-8068	Sketch is not able to create entities by "polar" coordinates
K3D-8070	Sketch is ignoring position menu options
K3D-8083	KCDrafting/Pro 2D: Many advanced functions are incorrectly disabled
K3D-8087	Regression: Single\File\Import\IGES\Unit\V_5.3\PME_LOGO.kxl
K3D-8089	KeyCreator 2021 SP1 can open but NOT import the attached Solid Edge DFT file
K3D-8116	.CATDrawing files cannot be Drag and Dropped into KC2021 SP1
K3D-8184	DynaSketch will not display the Distance/Angle Tooltip if the cursor is close to the first position
K3D-8321	Tools>Options>Select page Help content not updated for 2021 SP1 changes
K3D-8337	Solids within composite animates incorrectly during dynamic move if composite was previously moved
K3D-8519	Layout> Projected Instance should act as if all selected lines are flat to the drawing.
K3D-4190	POLYLINE CHAIN off solid edges creates polyline in wrong location.
K3D-4209	Boolean> Subtract does not properly keep the face colors of solids that have Material properties.
K3D-5449	There should be a way to ignore Sketch guidelines
K3D-7390	Holding the shift key to reverse selection order fails when cursor over a face in a feature
K3D-7392	Edges/Curves/Annotations are left out of selection options when cursor is over a feature
K3D-7656	Feature Control Frame arrowheads in the dialog do not match the intended choice.
K3D-7773	Update dynamic chain selection ToolTip information
K3D-7852	Hide some DynaHandle arrows based on display view
K3D-8464	The Mouse Cursor incorrectly uses the Custom Cursor when snapping to a Grid.
K3D-8549	When Sketch specifies an angle, the length of the line is wrong
K3D-8568	References on undisplayed levels still highlight.
K3D-8595	Changing the Material of a face in this file causes the Transparency of other faces to change.
K3D-8618	Auto-migration is not copying WSP, KBD, and CKT files if KC was installed in a non-Program Files folder.
K3D-8651	Style Editor's 'Get from existing entity' option is changing options incorrectly.
K3D-8722	Dynamic Primitive construction ToolTip is missing snap information
K3D-8723	Dynamic Primitive construction is not supporting Position Menu End Ent option
K3D-8730	Removing all entities from a composite does not delete the composite
K3D-8823	Selecting an Instance and other entity does not allow a Format change
K3D-8824	Selecting two different Instances does not allow a Format change
K3D-8825	Selecting an Instance and a Label tagged to a different Instance does not allow a Format change
K3D-8826	Selecting an Instance and a Line does not allow a Format change
K3D-8854	UG Drawing files can't be opened via dragging onto KeyCreator window
K3D-9002	Surface Finish Symbol's Leader line is incorrect if Allow Extension Lines Under Text Box is enabled
K3D-9018	Near position on a face is not near the cursor position when clicking
K3D-9039	Changing the Standard does not reset the Depth
K3D-9157	KeyCreator Pro 2022 toolbar icons and ToolTips don't match toolbars
K3D-9199	User requests that field note  401 also gets text from Annotations (notes and labels )
K3D-9235	The Detail Callout function cannot Backup to select a different Instance
K3D-9260	Moving an Ordinate Dimension origin away from an EndEnt causes an Access Violation error
K3D-9266	Dynamic selection is not picking face edges properly
K3D-9360	Loading a Material file in the Material dialog does not immediately update the color icon
